751039	WinterPark	ENA	1	RN: 2 RN: 1:1 to 1:4 based on acuity		2	N/A	N/A	N/A	N/A			
Master Nurse Staffing Plan Assumptions:													
			Added by Boyle CNO										
Clinical Staff Nurses and Nurse Aides (CNAs) are assigned to patients in hospital units based on their successful training and competency completion.													
Patient to RN assignments noted above are based on an "on average" calculation, i.e. at times a 1:4-6 patient assignment is appropriate based on patient needs/acuity and the qualifications and competency of nurse staffing available.													
Staffing is aligned with national standards and guidelines. Staffing decisions and assignments are made by Charge RNs each shift based on patient needs (acuity) and the qualifications and competence of nursing staff available.													
Charge RNs and the Administrative Clinical Coordinator (ACC) oversee and guide nurse to patient assignments based on patient acuity, staff qualifications, experience and competence.													
Strategies to promote health, safety and welfare of employees and patients are included in staffing assumptions and are operationalized by the unit-based charge RN and the ACC.													
Inpatient Master Nurse Staffing Plan Guideline provides additional details related to staffing processes.
