Information from your community partner in health and wellness.

November 2024

## AI writes new chapter in patient care

A new AI tool used by Denver Health medical providers transcribes doctor-patient office visits and general clinical notes, saving time and increasing patient engagement. “It’s allowed me to be a better listener to my patients,” said a nurse practitioner.

## A breath of fresh air in health care

Denver Health took another big step forward for environmental sustainability by turning off its centralized nitrous oxide delivery system at the main hospital. By using smaller, portable tanks in operating rooms, the health system will significantly reduce greenhouse emissions. “It’s really exciting to know we can have a bigger impact and try to improve health for Denver, the state of Colorado and the planet,” an anesthesiologist said.
