

# DENVER HEALTH JOURNEYS

Information from your community partner in health and wellness.

February 2025

## Alcohol-cancer link in spotlight

Drinking alcohol increases the risk for at least seven types of cancer. Despite the risks, public awareness remains low, and Colorado continues to have one of the highest alcohol-related death rates in the country. One Denver Health physician hopes better messaging can address the issue, mirroring the success of anti-tobacco campaigns.

## Norovirus: What you need to know

Norovirus, often referred to as the stomach flu, is the most common cause of vomiting and diarrhea in the U.S., and cases are surging alongside flu, RSV and COVID-19.
